| Role: | Senior Engineer/Engineer – Product Development |
| Location: | Bangalore |
| About Cartesian: | <p>We are Cartesian, a 12-year-old analytics firm. During this time, we've helped some of the largest brands across the globe unlock unprecedented value from their data.</p> <p>We have now forayed into the SaaS world with our first product SOLUS.</p> <p>SOLUS is a System of Intelligence that powers the micro decisions that a brand needs to make to communicate to its customers in a relevant manner. These micro decisions include product recommendations, reasons to talk, words to use, and timing and channel selection at an individual customer level. SOLUS comes pre-built with all the intelligence and expertise to enable this for brands within 4-6 weeks.</p> <p>SOLUS was recently inducted into the 2021 cohort of the NASSCOM Deeptech Club.</p> <p>As a company we are obsessed about our people, our processes, our clients, and our commitment to their growth. We expect every single one of our people to display the greatest sense of ownership and pride in the work they do.</p> <p>We're proud of what we've achieved, and our ambitions are far larger. What's important for us is not just where we get to, but HOW we get there. Of course, we don't have all the answers, but our joy comes from the exploration, and that's the kind of team we are.</p> |
| Key Responsibilities: | <ul style="list-style-type: none"> • Architect, Design and Develop Solus Services • Design Solus to make it configurable, and flexible and user-friendly. • Develop, QA the Solus and release to consulting team. • Performance Tune Solus Service for high throughput • Act as SPOC for Solus Service for Deployment Team to get Customer Live. • Troubleshoot Customer Live Issues. |
